

CampusAssist AI — ServiceNow Testing

Project Title: CampusAssist AI – Smart IT Support Portal and AI-Assisted Troubleshooting System
Author: Santhosh Akkiseti
Platform: ServiceNow
Phase: 3. Project Development Phase (3.1)

1. Overview

This document outlines the core test cases designed to validate the functional components of the **CampusAssist AI** portal and the **CampusCare AI** chatbot widget.

2. ServiceNow Test Cases

TC ID	Test Case	Expected Result	Status
TC_01	Portal Access	The campusassist_home portal loads correctly with header and chat widget entry.	To be verified
TC_02	Chatbot Initialization	Opening campuscare_chatbot loads welcome dialog and issue selection menu.	To be verified
TC_03	Wi-Fi Troubleshooting	Selecting Wi-Fi triggers step-by-step connection diagnosis instructions.	To be verified
TC_04	Hardware Troubleshooting	Selecting Hardware presents device check steps (peripherals, display, power).	To be verified
TC_05	Software Troubleshooting	Selecting Software guides student through installation and environment steps.	To be verified
TC_06	Account Lock Troubleshooting	Selecting Account Lock provides portal password reset and unlock steps.	To be verified
TC_07	Session Reset	Clicking reset clears active conversation history and returns to main menu.	To be verified
TC_08	Multiple Issues	Student can complete one troubleshooting flow and immediately start a new issue.	To be verified
TC_09	Context Escalation	Clicking "Escalate to Support" transfers chat summary into the request form.	To be verified
TC_10	ServiceNow Request Form	Request form displays student details, selected issue type, and description.	To be verified
TC_11	Record Creation	Submitting form creates a record in x_2065601_campus_0_student_it_request table.	To be verified
